

Trusted by Fire and EMS departments across the country.

# The AED made with first responders in mind.

Avive's emergency data-sharing technology and 911 integration aims to bridge critical gaps in cardiac arrest care. Empower your decision making and cardiac arrest response with real-time data from lifesaving AEDs.

“The ability to view AEDs in real time and track essential metrics provides a huge peace of mind, especially when it comes to maintaining their readiness for use. It reduces risk of failures in critical moments.”

**Ed Binns**

Director of Operations,  
WAVES Ambulance, Minoa EMS

## Fire

The role fire departments play in the Chain of Survival.

Fire department BLS responders can quickly arrive on the scene of a cardiac arrest emergency to begin or continue patient care before EMS arrival.

## EMS

Access and leverage post-use Incident Data.

EMS professionals play a vital role in the cardiac arrest Chain of Survival by advancing care and transporting a patient to the hospital.

Avive provides insight into defibrillation data with Avive's Rapid Incident Reporting.

# Why Fire departments and EMS choose Avive.

## Portable and easy to use

The lightest and smallest AED at 2.1 pounds and ultra-portable. Easy to carry to an emergency in a go-bag.

## Rapid incident reporting

Scan a QR code to access post-use incident data from the Avive Connect AED® immediately after powering off. Quickly send the patient's full incident report to first responders and physicians.

Seamless AED maintenance

Real-world training

Universal electrode pads

## Frequently asked questions.

### What feature does the Avive Connect AED® have to enhance emergency care?

Avive's Rapid Incident Data Retrieval allows first responders to access critical data from the AED on-scene through simply scanning a QR Code - no additional cables or adapters are required to quickly access data from the device. This data is extremely valuable to the healthcare providers who receive the patient at the hospital and can be used to inform their treatment decisions.

Avive's QuickRescue™ feature also allows an Avive Connect AED® to notify local 911 centers when the device is in use, which ensures that emergency services are made aware of the emergency even if a bystander has not yet called 911.

### PRO TIP

Shop at [store.avive.life](https://store.avive.life)

Equip your crew with **Avive's Mobile Responder Package** and be able to respond swiftly when needed. The hard carry case protects your AED from damage while bringing safety equipment with you on the go.

If you're looking to purchase multiple devices, call or email us for assistance.
